Education

M.S Software Engineering – Boston University, Boston, MA

B.S Computer Information Systems - College of Charleston, Charleston, SC

Active Certifications

IBM: Retrieval-Augmented Generation and Agentic AI Professional

DeepLearning.AI : Generative AI for Software Development

Experience

Senior Software Engineer, ANGI Homeservices, Inc., Remote (January 2022 - Current)

- Design, develop, and maintain enterprise-scale web and mobile applications.
- Build and evolve backend microservices using Java, Kotlin, and Spring.
- Develop and maintain secure, high-performance APIs using REST and GraphQL.
- Build and modernize frontend applications using React.js.
- Enhance the platform's marketplace matching algorithm, improving how homeowners are connected with qualified service professionals.
- Implemented Agentic AI-powered features, including natural language search, to improve both developer & customer experience.

Software Engineer, The Boeing Company, North Charleston, SC (September 2015 – January 2022)

- Build a cloud-based PaaS system infrastructure using OS virtualization and custom Docker containers
- Participate in architecture/design discussions and software development facilitating the modernization of Boeing's monolithic inventory/MRO application to a containerized, microservice-based SOA.
- Lead Boeing's React.js Community of Practice weekly discussion & manage reusable component repository
- Full-stack engineering of aesthetic web applications using React.js, Java, HTML/CSS, and Spring
- Engineer and maintain API for applications using GraphQL/REST endpoints in a CXF configuration
- Vigorous black-box testing prior to merging, often with 100% coverage requirements
- Maintain a GitLab version control repository for team use

Software Engineer, Scientific Research Corporation, North Charleston, SC (May 2013-September 2015)

- Develop and maintain software applications using C# and VB.NET in Visual Studio under Department of Defense contracts.
- Responsible for full software development lifecycle of several small applications
- Write utilities in JavaScript, VBScript or Autolt to integrate as system tools

- Build, update, and document Windows and Linux client/server systems at various classification levels

Software Developer, T-Metrics, Charlotte, NC (July 2012 – September 2012)

- Develop a speech recognition platform using VB.NET and Microsoft Speech Platform
